**HAMMONIA-MOTARD 'VOGELFLUG' CANDLE
HOLDERS SET OF 20**

This set of 20 chrome plated plug-in system candle holders from the German manufacturer Hammonia-Motard was designed in the 1960s. This iconic candleholder's name translates to "bird flight" which can be seen in the pieces's long sleek lines as you look at the individual modular piece. The candle stick holder can be configured and stacked in any way making it truly unique and playful. "Vogelflug" Candleholders take the beauty of nature and reinvent it with a Brutalist flair, creating a visually stimulating design.
