MID CENTURY ABSTRACT GEOMETRIC METAL AND ENAMEL WALL SCULPTURE

This 1970's Brutalist wall sculpture is an intricate and geometric collage made from copper and brass fired enamel. The eyes can feast on unique lines that pop with cool toned colors of painted enamel. Hues of blue blend with hints of red leading to a delicate mix of scattered purple through the various geometric shapes of the art. This sculpture is a grand focal point of a wall that adds depth with its visually dynamic design.

DESIGNER: Handcrafted
